

My Home Science Journal

For your safety, ask an adult to help you with this experiment. Follow the directions carefully.

Ask a question?

(Write any question you might have about the topic from the Home Experiment.)

1 Make a Hypothesis:

(Draw a picture of what you think will happen.)

2 Do an Experiment

(Draw a picture of your experiment.)

3 Draw a Conclusion

(Draw a picture of your results.)

Parent and Child Discussion:

Was your prediction correct? Why or why not? Did you get the same results when you did the experiment again the second time? From your results, is there another question to explore?
